

### HOT WATER GENERATOR

Ultra High Efficiency Gas Water Heaters uses advanced technology to deliver both outstanding performance and significant year-round energy savings.

- Retail laundry
- Commercial laundry
- Hotel laundry
- Hospital laundry
- Restaurant
- Office building
- Health care facilities
- School & University
- Sports stadium
- Industrial buildings

Inputs ranging from 9.1 to 23.5 kW  
(31,000 to 80,000 BTU/Hr)

- 51 mm (2") non-CFC foam insulation
- Hydrojet Total Performance System
- Vitraglas tank lining
- Available in NG and LPG
- Intelligent control system
- Electronic ignition which saves energy

**Available sizes: 100 Ltrs. To 2000 Ltrs.**

### STEAM GENERATOR

#### DIESEL, LPG & PNG FIRED STEAM GENERATOR

- Fully automatic steam generator.
- Modern design which can be installed in the finishing hall without heating effect.
- Based on shell & tube technology.
- Works on principal of reverse technology where flame & gases reverse in air tight chamber & in the process result in complete combustion & absolute utilization of energy with output efficiency of 90%.
- Fitted with imported burner.
- Imported float type water level
- Electric solenoid Valve
- Steam release safety valves.
- Built- in electric control panel

**Available sizes: 50 kgs To 200 kgs**
