

### Why LG Dryers

The Electric dryers come with Sensor dry technology as standard. This helps over drying and can help prevent fires. The dryers can be stacked on top of LG washers or on top of other LG Dryers. Giving you and your business flexibility.

### Heavy Duty Motor

LG Commercial Dryers incorporate the sturdy motor additionally and it provides better air flow and heating system. This creates better drying action and increases dry capacity.

### Gas/Air Flow Optimization

LG Conventional dryers control air and gas flow by turning the unit ON and OFF. Instead, LG Commercial Dryers allocate the appropriate amount of gas and air into several sections to control air flow. This significantly increases energy efficiency.

### Steel Control Panel

The front access panel is constructed of strong coated steel – not plastic, to enhance reliability for the machine control assembly.

**Available Sizes 10 & 15 kg. dry weight per charge capacity.**
