

Atomizing System

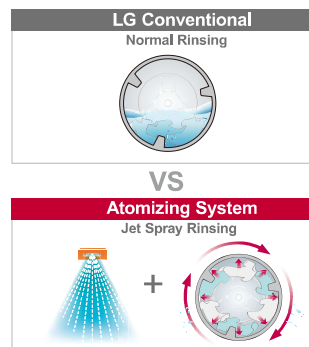

The Atomizing nozzle sprays fresh water onto the clothes and the door. This helps produce a rapid fill so clothes are soaked sooner and longer providing a better washing performance. It also cleans the door glass every time the water sprays on it, reducing your burden of cleaning any excess soap residue.

Water Saving

10° Tilted Drum

LG's commercial washer tub is tilted at 10°. It enables the washer to have a higher level of water in the tub than the competition. This allows us to use less water while not sacrificing superior washing performance.

Customized Program

Users can design their own programs such as washing time, rinse time, water level, etc. and save up to 20 washing programs to meet optimized washing performance.

Available Sizes 10 & 15 kg. dry weight per charge capacity.
